Overview

This document will detail the necessary configuration steps, and where to find pertinent information for configuration steps when setting up 3rd Party Integrations with Heartland Restaurant.

Where only '**Required Information**' is provided, it is assumed that the only setup required in addition to entering information is to:

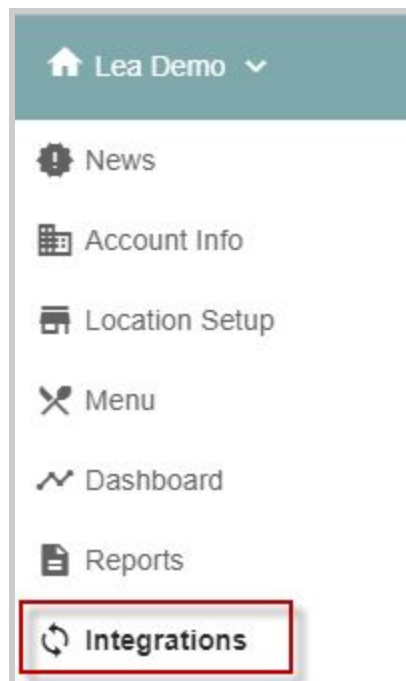

1. Ensure that the box under **Active** is checked.

2. Once all required information is entered select the **Save** icon  at the bottom right.
3. Where denoted, enter information provided after enabling the integration and select the **Save** icon  when done.

Where do I go to set up an Integration?

1. Log into the [Admin Portal](#).
2. Navigate to the desired **Location**.
3. Select **Integrations** from the left.

API

Description

This option will expose a key that is unique to the Heartland Restaurant location.

This can be provided to 3rd party integrators who need to pull information from Heartland Restaurant.

Some 3rd Party Integrators **only** need this key(or nothing additional).

Important Note: An API Key should only be provided to dealers for **existing certified 3rd party integrations**. These are denoted in this [document](#). Otherwise the request must be approved by management.

Required Information

- No information is required from the integrator

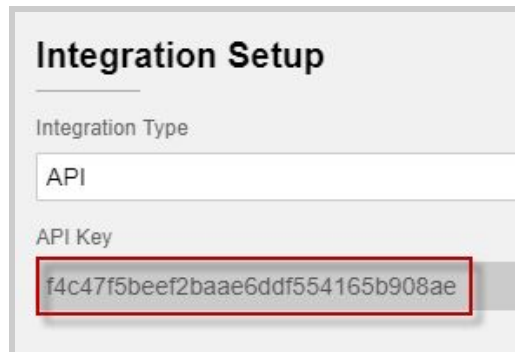

Setup

1. Select **API** as the integration type then select the **Save** icon  at the bottom right.

The screenshot shows a form titled "Integration Setup". It has two main sections: "Integration Type" and "API Key". In the "Integration Type" section, there is a dropdown menu with "API" selected and highlighted by a red box. The "API Key" section below it is currently empty.

2. An alphanumeric key will populate in the **API Key** field. Copy this key and provide it to the person requesting this access.

The screenshot shows the same "Integration Setup" form. The "Integration Type" dropdown still shows "API". In the "API Key" section, a long alphanumeric string "f4c47f5beef2baae6ddf554165b908ae" has been generated and is highlighted by a red box.

3rd Party Integrators that Only Need an API Key

- Checkmate
- opensimsim
- 7Shifts
- Compeat
- CTUIT
- QSR Online
- Powercard
